

# How To Get Rid Of Cockroaches?

BY  
Master Pest Control

Cockroaches are an annoying pest, they depends on humans shelter for their survivals. Our homes provides them all the necessary things to sustain their life, such as food, water and shelter. They worsen the condition of house by grossing the house and spreading diseases. There is no easy way to get rid of cockroaches, you need to be extra careful while [Cockroach Pest Control](#). While, it's best to hire professionals for cockroach control, you can also eliminate the cockroach infestation by yourself.

By following some simple methods you can get rid of cockroaches.

**Step-1 Cockroaches Trap**

**Step-2 Anti-Roach Gel**

**Step-3 Borax Powder**

# Step-1 Cockroaches Trap

Use cockroach trap to capture the cockroaches, you can get the cockroach trap from any local store and use it in your home or office. The cockroach trap works when there is food, cockroaches come by attracting towards food and go inside the trap, once they go inside the trap, they won't be able to come out on their own, therefore they get trapped, later you can spray anti-cockroach spray to kill them or put a poison inside the trap, so that cockroaches can die.

# Step-2 Anti-Roach Gel

Anti roach gels are quite effective in dealing with pests, you can buy from a local store and get rid of cockroaches. Apply the anti-roach gel in the suspected area, where you usually see cockroaches. When cockroaches eat this gel, they don't die instantly, but they go to their home back and spread the poison among others. This is how the whole colony of the cockroaches gets infected and dies instantly.

# Step-3 Borax Powder

Borax powder is a natural instant cockroach killer, leave the borax powder overnight and when the cockroach cross over the borax powder, they die, don't worry about how? But borax do something with cockroach respiratory system which caused death.
